

SPRING THAW 2019

On April the 10th Watson Diesel Inc. hosted its 5th annual "SPRING THAW OPEN HOUSE" at its Rt 14 municipal Facility located in downtown Canton, PA.

Watson Diesel uses this annual event as a way of celebrating the end of winter and to welcome in spring. But it is also used to thank our old customers and invite new customers to tour our facilities and more important to meet our employees that are the backbone of our organization.

We also use this day to show case a new product or facility feature. We used this year's event to show case our new showroom and warehouse facility located next door to our fabrication building. This recently renovated building houses our offices, conference room and parts warehouse. This new facility allowed us to display our recently up-fitted F-550 plow truck equipped with our WD-218 Wing Plow in the center of the show room.

We want to thank the over 350 in attendance representing 15 counties from the commonwealth, 4 New York State Counties and 23 vendors with displays for making this year's event a fun and successful event. We can't wait for next year to do it again!
